

The American Academy of Oral Medicine  
INTEGRATING MEDICINE AND DENTISTRY

Dear Friends and Colleagues,

Spring is around the corner, and we are very excited to host our FIRST annual in-person meeting in almost three years. The meeting theme, **Expanding the Frontiers of Knowledge**, provides a great insight into cutting-edge evidence on pressing topics in our specialty. The lectures and seminars range from oral oncology to molecular mechanisms of orofacial pain, oral dysplasia, mucosal disease, practice management, residency program setup, hands-on case discussions, and much more!

You can find the full meeting program at <https://2022conference.aaom.com>

Thanks to an outstanding organizing committee and the contributions of many members, we will also have a prequel of the **World Workshop of Oral Medicine**, occurring earlier the same week, and a preview of our **new Strategic Plan**. Memphis, Tennessee, our location, boasts an average temperature of 70 degrees in early May. Our host venue is the **Peabody Hotel**, a historic gem in this fabulous city. Please check out our AAOM website for interesting information about Memphis and surrounding areas.

More importantly, the annual meeting allows us to share precious camaraderie, celebrate our specialty recognition, and make up for lost time over the past years. We are still seven weeks away, and the momentum is building up. I encourage you to make your meeting attendance arrangements soon, as our room block is getting to capacity.

Our Executive Committee and I look forward to meeting everyone and catching up.
